"body": "Some of the ransomware operations using this botnet for network access include the infamous Ryuk, Conti, REvil, as well as a new one called Diavol, the Romanian for Devil. With Emotet's takedown by law enforcement, Trickbot activity started to increase to such levels that in May it was the most prevalent malware on Check Point's radar. The malware maintained its position this month, too, the cybersecurity company notes in a report today, adding that Trickbot's maintainers are constantly working to improve it. According to Check Point's telemetry, Trickbot impacted 7% of organizations across the world, followed by the XMRig cryptocurrency miner the Formbook info stealer, which affected 3% of the organizations that Check Point monitors worldwide. New VNC module in the works

In another report, Romanian cybersecurity company Bitdefender says that its systems caught a new version of Trickbot's VNC module (vncDLL), used after compromising high-profile targets. The updated module is called tvncDLL and allows the threat actor to monitor the victim and collect information that would enable pivoting to valuable systems on the network. Although tvncDLL was discovered on May 12, the Romanian researchers say that it is still under development, "since the group has a frequent update schedule, regularly adding new functionalities and bug fixes." Bitdefender's analysis of the module points out that it uses a custom communication protocol and reaches the command and control (C2) server through one of nine proxy IP addresses that enable access to victims behind firewalls. Trickbot's tvncDLL module attack overview

The VNC component can stop Trickbot and unload it from memory. When an operator initiates communication, the module creates a virtual desktop with a custom interface. During normal operation, the alternate desktop is created and fully controlled by the module, copying the icons from the desktop, creating a custom taskbar for managing its processes and creating a custom right-click menu, containing custom functionality," Bitdefender researchers write in their report.

Right click menu for Trickbot's tvncDLL

Using the command prompt, the threat actor can download fresh payloads from the C2 server, open documents and the email inbox, steal data from the compromised system. Another option called Native

Browser fires up a web browser by taking advantage of the OLE automation feature in Internet Explorer. The function is under development and its purpose is to steal passwords from Google Chrome, Mozilla Firefox, Opera, and Internet Explorer. The researchers say that while the old vncDLL module has been in use since at least 2018, its successor became active in the wild on May 11, 2021, according to evidence revealed during their investigation. Telemetry data from Bitdefender data shows Trickbot's C2 servers spread on almost all continents, with the largest number (54) located in North America. According to the company, the number of C2 servers has increased significantly this year, jumping from around 40 in January to more than 140 in June. ```

started to increase to such levels that in May it was the most prevalent malware on Check Point's radar. The malware maintained its position this month, too, the cybersecurity company notes in a report today, adding that Trickbot's maintainers are constantly working to improve it. According to Check Point's telemetry, Trickbot impacted 7% of organizations across the world, followed by the XMRig cryptocurrency miner the Formbook info stealer, which affected 3% of the organizations that Check Point monitors worldwide. New VNC module in the works In another report, Romanian cybersecurity company Bitdefender says that its systems caught a new version of Trickbot's VNC module (vncDLL), used after compromising high-profile targets. The updated module is called tvncDLL and allows the threat actor to monitor the victim and collect information that would enable pivoting to valuable systems on the network. Although tvncDLL was discovered on May 12, the Romanian researchers say that it is still under development, "since the group has a frequent update schedule, regularly adding new functionalities and bug fixes." Bitdefender's analysis of the module points out that it uses a custom communication protocol and reaches the command and control (C2) server through one of nine proxy IP addresses that enable access to victims behind firewalls. Trickbot's tvncDLL module attack overview The VNC component can stop Trickbot and unload it from memory. When an operator initiates communication, the module creates a virtual desktop with a custom interface. During normal operation, the alternate desktop is created and fully controlled by the module, copying the icons from the desktop, creating a custom taskbar for managing its processes and creating a custom right-click menu, containing custom functionality," Bitdefender researchers write in their report. Right-click menu for Trickbot's tvncDLL Using the command prompt, the threat actor can download fresh payloads from the C2 server, open documents and the email inbox, steal data from the compromised system. Another option called Native Browser fires up a web browser by taking advantage of the OLE automation feature in Internet Explorer. The function is under development and its purpose is to steal passwords from Google Chrome, Mozilla Firefox, Opera, and Internet Explorer. The researchers say that while the old vncDLL module has been in use since at least 2018, its successor became active in the wild on May 11, 2021, according to evidence revealed during their investigation. Telemetry data from Bitdefender data shows Trickbot's C2 servers spread on almost all continents, with the largest number (54) located in North America. According to the company, the number of C2 servers has increased significantly this year, jumping from around 40 in January to more than 140 in June. "body": "Here's another guy, they have PDRs, lots of accesses, but something he
He wants a lot of money... 35% for access with AD, I say let's do it without AD, it
takes 2 hours to get it... initially he set the price at 50, says it works with
several affiliates...\n\n\n\n[22:18:47] <rdpcorp_@thesecure.biz> what types of
access do you work with? forti vpn, rdp, citrix, cisco? \n[22:18:48] <traffz007>
I'm a direct project support, not a middleman or anyone else, if you're into it and
you know our boss you can make sure \n[22:18:53] <traffz007> yes we take everything
\n[22:19:12] <traffz007> you can in the form of bots, you can in the form of
accesses, rdp, no problem
\n[22:19:15] <rdpcorp_@thesecure.biz> we don't know, but we certainly have heard
of the locker conti)
\n[22:19:19] <rdpcorp_@thesecure.biz> forti vpn familiar too? \n[22:19:21]
<traffz007> if there is no AD does not matter, a couple of hours will get
\n[22:19:25] <traffz007> yes of course \n[22:26:05] <rdpcorp_@thesecure.biz>
discussed with their, for 35% agree, if no AD then agree for 15%, but such we have
very rare, if you agree from you people / people who are often online, to throw a
checklist to work and panel)
\n[22:26:38] <traffz007> let's take it without Ad then, the chief won't let
\n[22:26:50]
<traffz007>25 usually, well, we30 give the most expensive guests there, won't35
give \n[22:27:04]
<traffz007> I can make access to our zhabba and there konnect with the operator
hackers \n[22:27:23] <traffz007> and you there already directly in touch with
them, they will give access to chats, etc \n[22:27:57] <rdpcorp_@thesecure.biz>
well the point is no less, we say 50/50 work, but there's still affiliates take
their 20%, but since. But they take their 20%, but since you have from 100% ready
to pay for mate35.. will be a lot and stable, there's a lot of
10-15 nets a week, sometimes less, of course... say 3-5, not always a good
catch \n[22:28:27] <traffz007> understand, I will offer the boss, if he
agrees, I'll write back \n[22:28:34] <rdpcorp_@thesecure.biz> okay
}

    "body": "Here's another guy, they have PDRs, lots of accesses, but something he

```

He wants a lot of money... 35% for access with AD, I say let's do it without AD, it takes 2 hours to get it... initially he set the price at 50, says it works with several affiliates... \n\n\n\n\n[22:18:47] <rdpcorp_@thesecure.biz> what types of access do you work with? forti vpn, rdp, citrix, cisco? \n[22:18:48] <traffz007> I'm a direct project support, not a middleman or anyone else, if you're into it and you know our boss you can make sure \n[22:18:53] <traffz007> yes we take everything \n[22:19:12] <traffz007> you can in the form of bots, you can in the form of accesses, rdp, no problem \n[22:19:15] <rdpcorp_@thesecure.biz> we don't know, but we certainly have heard of the locker conti) \n[22:19:19] <rdpcorp_@thesecure.biz> forti vpn familiar too? \n[22:19:21] <traffz007> if there is no AD does not matter, a couple of hours will get \n[22:19:25] <traffz007> yes of course \n[22:26:05] <rdpcorp_@thesecure.biz> discussed with their, for 35% agree, if not YES, then agree for 15%, but such we have very rare, if you agree

from you person/people who are often in the network, so that the mate to throw to the job and the panel)

\n[22:26:38] <traffz007> let's take it without Ad then, the chief won't let
\n[22:26:50]

<traffz007>25 usually, well, we30 give the most expensive guests there, won't35 give
\n[22:27:04]

<traffz007> I can make access to our zhabba and there konnect with the operator hackers
\n[22:27:23] <traffz007> and you there already directly in touch with them, they will give access to chats, etc
\n[22:27:57] <rdpcorp_@thesecure.biz> well the point is no less, we say 50/50 work, but there's still affiliates take their 20%, but since. But they take their 20%, but since you have from 100% ready to pay for mate35.. will be a lot and stable, there's a lot of 10-15 nets a week, sometimes less, of course... say 3-5, not always a good catch
\n[22:28:27] <traffz007> understand, I will offer the boss, if he agrees, I'll write back
\n[22:28:34] <rdpcorp_@thesecure.biz> okay

    "body": "I pulled up a team of arbitrageurs, they do the traffic globally from fb
and google, they have their own loader, but they deal with crypto in general,
offered them to try to work on networks, I say you do the traffic, we ourselves
monitor networks, if what we share, and logs on crypto and others that will come -
all to them. They should be launched next week. Tom also seems to start on Mondays,
we gave him everything he needs.

```

crylock - they said they were broken, they have pentesters, targeting, they only need a locker. I said okay, we'll give them for 30%, they refused, they say a lot. I think I should squeeze them and try to steal their adversaries and pentesters, I think how to do it))))\n\n \" akonitborec@thesecure.biz I'm an admin of another cryptolocker, not so popular

- crylock. And that's where we're having a hiccup and we're going to be rewriting it, which is a long time coming. So to make sure my work is not lost, I'm looking for a new locker partner. I have several pentester teams, several stand-alone pentesters, and my taggers, of all kinds. I only need a locker, but actually 30% would not work for me. Because the big teams I had were working for a lower percentage, and I still have to earn something from administration. Your locker was in my hands from intermediaries and I tested it, it is not bad, so I wrote. If you have a more interesting offer for the %, I am ready to consider. \I've got all the reports on modules and bugs in trike, so far the main problem is with importdll and superbrowser, everything else works fine, everything was cleaned up and updated. I don't know about vnts yet, but everything is in progress.

for each
Summary.\n1. Sj access + Hh office rental (best offer)! Monthly
limit:15 tr; n/weekly limit: 7 n/day3 5
n/day :4 tr.nSuperjoblimit of 25 resumes/working
days, no timelimit. Hh already has 75,000 contacts open. Open resumes are not
burned out for a year. About 25% of resumes will be free for you as they are
already open by other managers in our company. You pay 60 rubles in advance for
each resume (instead of 73). Access Sj\n month:13 tr;\n
week2 : 8 week:5 tr;\n
day3 3 day: 2
\nLimit resumes/working25 days, there is no work time limit. This site is enough
to cover 80% of the jobs.\n3. Rent our office for Hh\n a month:
7 tr; \n-week:4 tr; \n-day3 :3 tr;\n-day:
2
You pay 60 rubles in advance for each resume (instead of 73 rubles). (instead of
73). You can open as many CV tabs as you want and see all information except
contact information, and pay only for the resumes you need. Also open resumes are
not burned, and available for a year. About 25% of resumes will be free for you,
because they are already open by other managers of our company.\n \nIf there are
any questions, here is my work number, I will tell you everything in details
89062696551\n \n Answers to the most common questions:\n
\n1. You can open as many resume tabs as you want and see all the information
except the contact information. By clicking on the "Open Contacts" button, you are
charged with 1 view. At the bottom of the program you can see how many resumes you
have available. How do I pay for my resume package? n First you determine how many
resumes you need and pay the required amount in advance. If you run out, you can
buy more by giving me 24 hours notice.n3. How many resumes can I see per day?
1 day.\n4. What do you mean resumes can be burned? For example, if you pay for a
week or a month, your resume will be open during that period. We have a year's
rate, so resumes won't burn out. Will some CV's be open? Yes, some CV's are already
open for you, in time we will have 30-35% of them. That's about 3 out of 10 resumes
will be available. How do I get access? nLogin to my account is through a special
program, due to security conditions. Otherwise it is the same. How many people can
use the purchased cabinet? nOne cabinet - one user, if you need more users, you can
buy an additional cabinet.n7. At what point does the access time start to run? nn
As soon as I send the login/password.
  }

    "body": "I pulled up a team of arbitrageurs, they do the traffic globally from fb
and google, they have their own loader, but they deal with crypto in general,
offered them to try to work on networks, I say you do the traffic, we ourselves
monitor networks, if what we share, and logs on crypto and others that will come -
all to them. I got an offer from some sort of competitors, crylock affiliate - they
say they are kind of broke, they have pentesters, targeting, they just need a
locker. I said ok, we'll give them 30%, they refused, they said a lot. I think I
should squeeze them and try to steal their adversaries and pentesters, I think how
to do it)))\n\n \" akonitborec@theseecure.biz In general I am an admin of another
cryptolocker, not so popular
- crylock. And that's where we're having a hiccup and we're going to be rewriting
it, which is a long time coming. So to make sure my work is not lost, I'm looking
for a new locker partner. I have several pentester teams, several stand-alone
pentesters, and my taggers, of all kinds. I only need a locker, but actually 30%
would not work for me. Because the big teams I had were working for a lower
percentage, and I still have to earn something from administration. Your locker was
in my hands from intermediaries and I tested it, it is not bad, so I wrote. If you
have a more interesting offer for the %, I am ready to consider. \I've got all the
reports on modules and bugs in trike, so far the main problem is with importdll and
superbrowser, everything else works fine, everything was cleaned up and updated. I
don't know about vnts yet, but everything is in process".

Summary.\n1. Sj access + Hh office rental (best offer)! Monthly
limit:15 tr; n/weekly limit: 7 n/day3 5
n/day :4 tr.nSuperjoblimit of 25 resumes/working
days, no timelimit. Hh already has 75,000 contacts open. Open resumes are not
burned out for a year. About 25% of resumes will be free for you as they are
already open by other managers in our company. You pay 60 rubles in advance for
each resume (instead of 73). Access Sj\n month:13 tr;\n
week2 : 8 week:5 tr;\n
day3 3 day: 2

\nLimit resumes/working25 days, there is no work time limit. This site is enough
to cover 80% of the jobs.\n3. Rent our office for Hh\n a month:
7 tr; \n-week:4 tr; \n-day3 :3 tr;\n-day:
2

You pay 60 rubles in advance for each resume (instead of 73 rubles). (instead of
73). You can open as many CV tabs as you want and see all information except
contact information, and pay only for the resumes you need. Also open resumes are
not burned, and available for a year. About 25% of resumes will be free for you,
because they are already open by other managers of our company.\n \nIf there are
any questions, here is my work number, I will tell you everything in details
89062696551\n \n Answers to the most common questions:\n

\n1. You can open as many resume tabs as you want and see all the information
except the contact information. By clicking on the "Open Contacts" button, you are
charged with 1 view. At the bottom of the program you can see how many resumes you
have available. How do I pay for my resume package? n First you determine how many
resumes you need and pay the required amount in advance. If you run out, you can
buy more by giving me 24 hours notice.n3. How many resumes can I see per day?
1 day.\n4. What do you mean resumes can be burned? For example, if you pay for a
week or a month, your resume will be open during that period. We have a year's
rate, so resumes won't burn out. Will some resumes be open? Yes, some resumes are
already open for you, eventually we will have 30-35% of them. I mean, some of the
resumes10 will already3 be available. How do I get access? nlog in to the office
through a special program - it's dictated by the conditions

security. Otherwise, it's the same. How many people can use the purchased account?
nOne account - one user, if you need more users, you buy an additional account.n7.
At what point does the access time start to run? nn As soon as I send the
login/password.

                they fly alone
            }
            I'm pretty sure, for some reason, that they're not uploading properly. Here's my
            reasoning. If you knocked out a file from hanypot - it will knock out and sucker.
            Another question is how they give it away, if they spam by bit attaches - hanypots
            are inevitable... Asked for reports on crypts and stubs - everything works. Hough
            cleans up the sources. So I don't see a problem on our end. Tomorrow I will test
            everything on my virtual machines with my own hands and we will try to figure it
            out. But most likely they either spammy or cockerel bases...".
