  "body": "2. I got the indexing part as far as I remember about a week ago is the storage_ex repository. I don't think it's my responsibility to know all the repositories I need to learn, if I had it earlier then the situation where I look at the code and don't understand how to work with it probably wouldn't be so fatal. \Well, I think it's my responsibility to figure it out and figure it out and I think I'm up to the task because of my speed and ability to do it.{nYour task and that of others who are involved, to give me access, code, servers and everything I need to work efficiently, I don't think it's perfect, so this is your responsibility specifically. I'm not Mav, I'm a different person, I try to do my job and I put enough effort into it. I'm not going to work my ass off, working 'to the result' and around the clock is a direct path to burnout, if you think I'm a function, I don't agree with that approach and I will continue to insist on it.
}

  "body": "Reverse is very happy with the loader that I finally fitted
  them\n[09:19:29]
<revers> The coder is smart, by the way...\nDerek is quiet about the container,
they're twisting something in the wiring.\nProfessor gave me a task to develop a
software to download contact bases from date tags. I suggested to develop it a
little bit and add a check for duplicates, live/dead mails and other small things,
we will collect our own date, By the end of next week the "external" injector
module will be ready. I've made some charts for cryptors - for now we take them out
completely by our own forces, Derek only orders third party crypts as a precaution.
I've collected bots that are crooked according to Vnts, I presented them to coders,
they're looking at them. Somewhere bots immediately fall off, as soon as you run
them - where browsers are stupid, white screen, and that's it.nnThe trike itself
seems to knock very much, all the modules are fine, imports".
